

Report for Aadhaar4U foundation about dormitory repair work- March 2021

Respected Vrinda and Girish Thakur,

Snehalaya family is sincerely grateful to you and Aadhaar4U foundation for your continued support for our various initiatives. This year you have extended your support for initiating the Girls Dormitory repair work and purchasing some essential equipment's for the same.

As you may know, Snehalaya has completed 3 decades of service. Our Rehab Center is the oldest project of Snehalaya which initiated in 1992. The children stay in dormitories while the care takers also have their residence here. These dorms were in urgent need of repair & new furniture. We had appealed to your esteemed organization to support maintenance and repair work, to which you all have responded wholeheartedly.

We initiated the plumbing and repair of the bathrooms and toilets which was the primary need. This will be followed by electric fitting, purchasing and installation of miscellaneous items like ceiling fans, tube lights, beds etc... in the dormitories.

In November 2020, we had shared photos of the previous condition and the on-going brick work. The work has progressed still further and we are sharing some latest photos here for your reference. We hope to finish the work at the earliest.

However the pandemic has resurfaced again, especially in Maharashtra with the number of cases rapidly climbing day by day. We hope that things return back to normal and the repair work can be continued as it has been going on now.

Thanks with Regards,

Dr Girish Kulkarni

Snehalaya
